Make Your Own Gray Fox

Materials
- paper plate
- gray construction paper
- white paper
- black marker
- scissors
- glue stick
- crayons

The gray fox is a small omnivore that lives across North and Central America. Follow this guide to make your own gray fox using a paper plate!

Instructions
1. Gather your supplies.

2. Cut your paper plate in half. If you are making this craft with a friend or sibling, you can give your other half to them!
3. Cut your half of a paper plate into 1/3 and 2/3 pieces. The larger piece will be the body and the smaller piece will be the head.

4. On your gray construction paper, draw 2 ears, 4 legs, and 1 long, bushy tail using your black marker.
5. On your white construction paper, draw 2 big eyes for your fox. If you have googly eyes at home, you could use these too!

6. Cut out the pieces you drew in steps 3 and 4.

7. Put everything together! Glue your legs and tail to the body, glue the ears and eyes on the head, give your fox a nose with your black marker, and finally, glue the head on the body!
8. Now you’ve got your own little gray fox! Feel free to color in the rest of your fox’s body using your crayons. What sort of adventures await you and your fox out in the world?
