Camp UTLEY,

Charles Feet 167862.

Co send my letter I free I, and having channed my mind about going hower. I have concluded to write arain. I am all right as far as health is concerned. We have done nor drilling since ige have been him; consequently wer lettle to do. I have just been out on the lake shore. Old Spake hickgan changing every day; presented a hear scent this morning. The

as I could see about four inches thick. all this great body of ice was slowly moving morthward, the banks. Attended of few rods to the south, along the take shore, about fifteen inches thick, through the center of which a canon hall had passed, leaving the tree nearly in lux. The ball was projected from one of the canon belonging to the battery bys. The distance was about forty rods. By this now can see with what force Their balls are sent . -Gesterday we had quite a fun in campo. To have a quand stationed at each door of the rome. Did Howard was one of these quards, his place being at the front down . He has orders to guard an apartment

writing-desk ver Charlie Holt came along inquiring for the muskets. He was told where they was. The slepped into the rom to get one . Did low him he had orders to keep persons out of there. Thaslie said he would go out when he got ready. Vis pricked him with his bayoned. Thashes then struck him twice with his fist For This offence he was sent to the The 14th and 15th of this month were The coldest days I have known this uniter; but with two his oloves, The pipe sid hot for four or fine lenoths, night and day, we have resot quele warm. I write this better to let zon know that there is no knowing when & shall go home. There is no certainly about any thing here. Our mencoals are here, and we expect to

get them lornwrow; and we expect to be mustered in a week from Sanday; and I expect to go home. a week from Wednesday; and me expet to get our pay the 1 de of March; but no one knows anything about anything In neight link for me ar all; that The way to do N. I have just get into a squad of len men, who cook for themselses. This makes the third good of the number which has been formed lately I have just received an answer to my letter to of jound. Thy are all right. Please answer this I expect to send this . Comoson of Powl Redgield, or some one

O. S. Panforth

To all the dear friends at home.

Sunday, Feb 16th 1862.

Having a good chance
to send my letter free, and having
changed my mind about going
home, I have concluded to write
again. I am all right as far as
health is concerned. We have
done no drilling since we have
been here, consequently we have but little
to do. I have just been out on
the lake shore. Old Lake Michigan
changing everyday presents
a new scene this morning. The
lake was all froze over as far

Page 2 as I could see about four inches thick. All this great body of ice was slowly moving northward, the edges rubbing off against the banks. A \few rods to the south, along the lake shore, we saw a green red oak tree, about fifteen inches thick, through the center of which a canonball and passed, tearing the tree nearly in two. The ball was projected from one of the canon belonging to the battery boys. The distance was about forty rods. By this you can see with what force these balls are sent. Yesterday we had quite a fuss in camp. We have a guard stationed at each door of the room. Sid Howard was one of these guards, his place being at the front door. He had orders to guard an apartment containing a few muskets, a tool chest

Page 3 a writing desk &c. Charlie Holt came along inquiring for the muskets. He was told where they was.

He stepped into the room to get one. Sid told him he had orders to keep persons out of there. Charlie said he would go out when he got ready. Sid pricked him with his bayonet. Charlie then struck him twice with his fist. For this offence[sic] he was sent to the guardhouse for only two hours. The 14th and 15th of this month were the coldest days I have known this winter; but with two big stoves, the pipe red hot for four or five lengths, night and day, we have kept quite warm. I write this letter to let you know that there is no knowing when I shall go home. There is no certainty about anything here. Our overcoats are here, and we expect to

Page 4
get them tomorrow; and we expect
to be mustered in a week from
Tuesday; and I expect to go home
a week from Wednesday; and we
expect to get our pay the 1st
of March, but no one knows
anything about anything.
You needn't look for me at all
that's the way to do it.
I have just got into a squad of
ten men, who cook for themselves.
This makes the third squad of that
number which has been formed lately.
I have just received

an answer to my letter to S[?]
They are all right. Please answer this soon. — I expect to send this tomorrow by [?] Redfield, or some one else.

C. A. Danforth Racine
